

# Absolute metric values relative to evaluation targets (no-P models excluded)

● Training seed 1    ■ Training seed 2    ▲ Training seed 3    -.- Evaluation target    ■ Observed V0 value min-max

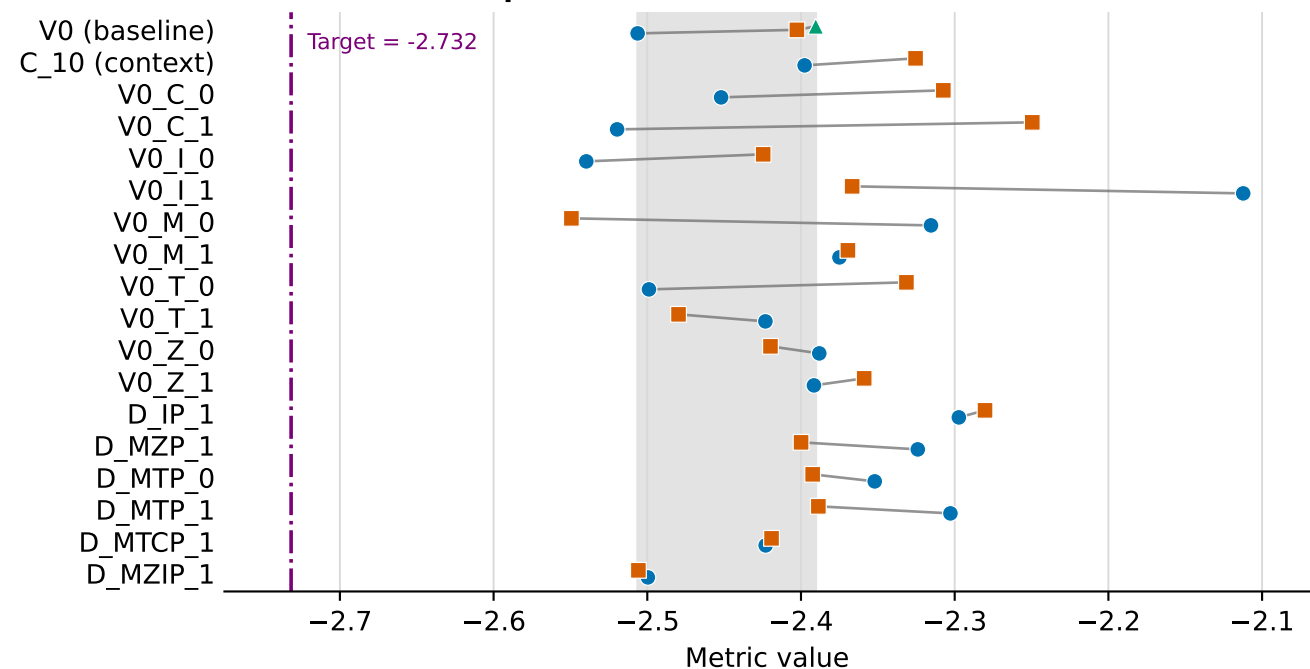

**CRPS (lower is better)**

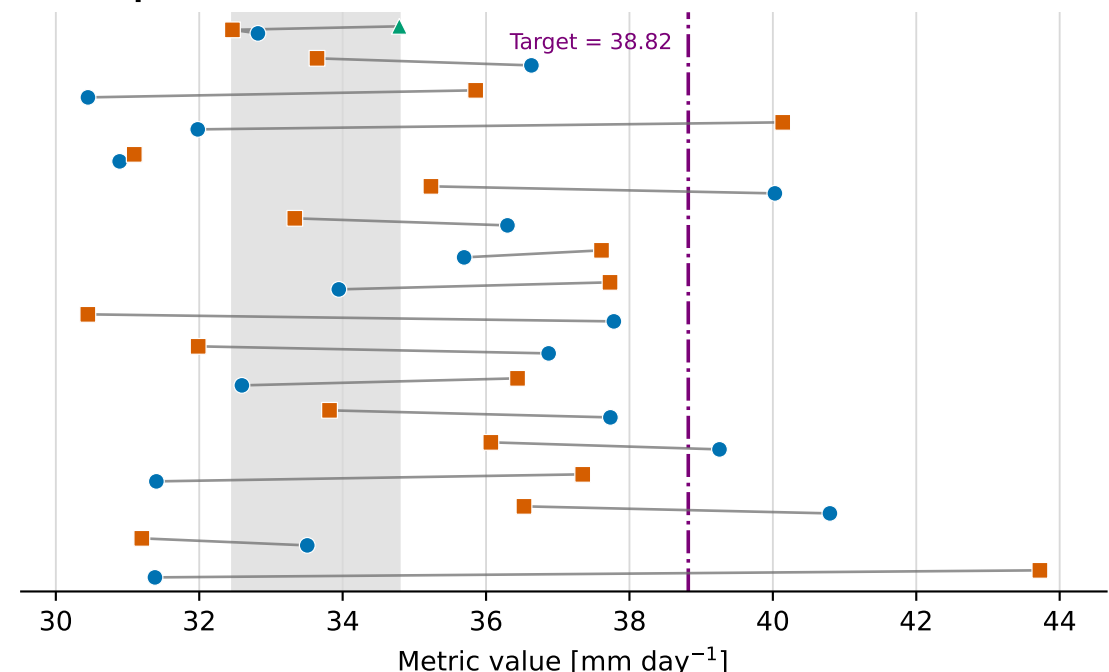

**Integrated skill score (higher is better)**

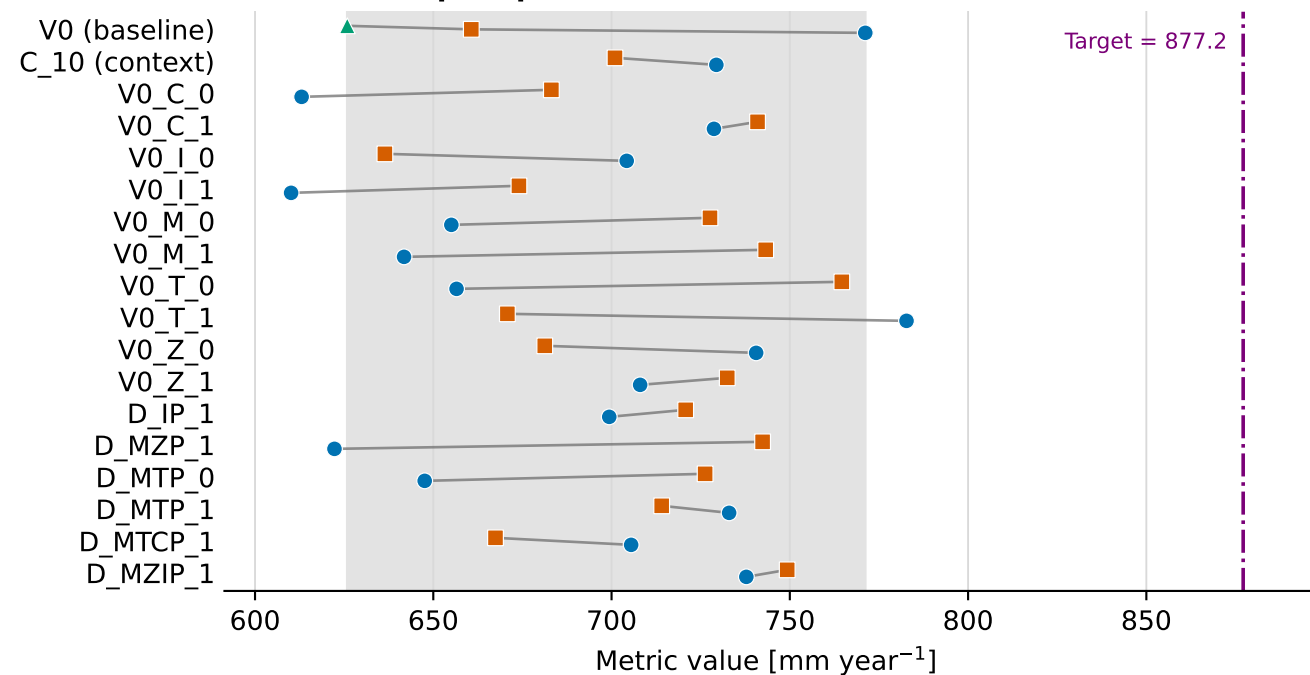

**Mid-scale PSD slope (closer to HR is better)**

**99.9th percentile (closer to HR is better)**

**Mean annual precipitation (closer to HR is better)**

**Spatial SD of annual precipitation (closer to HR is better)**
